# Smart Grid Workshop, North Carolina

A Process for Progress: The Smart Grid Investment Grant Program and Economic Development

## Hosted by:

North Carolina A&T State University  
*Center for Energy Research and Technology - CERT*

## Location:

Proximity Hotel, Greensboro, NC  
(First LEED-Platinum Hotel in United States)

The purpose of the Smart Grid Workshop is to gather leaders from utilities, academia, the private sector, and federal, state, and local government to delineate goals and objectives for the Smart Grid. Workshop participants will use this platform to explore the alignment of academic research and development programs with industry-based system solutions for advancing an array of electric power system grid-innovative technologies.

Information Regarding Registration  
and Agenda Details will be Announced  
at a Later Date

**March 16, 2011**
